

Teach with explainer videos

Short, engaging, educational videos are one of the best types of learning materials. You can create simple animated explanations on the digital whiteboard. Mix and match (almost) any media, add your live video and record your voice to be more present. Then, you can simply upload it to your YouTube channel or Google Drive, or share it instantly via the smart Web Video Link.

Add pdfs, texts, images, clipart - don't limit yourself!

Prepare anything that you'd like to have in the video on the canvas.

Turn on the camera and **record** while annotating text, sketching and explaining a topic with your voiceover. Move objects around to create your animation.

Edit whatever you need on the timeline or add even more materials to your video.

Share the whiteboard video with your students. Choose the most convenient way.
