

National Geographic Learning’s mission is to bring the world to the classroom and the classroom to life. With our English language programs, students learn about their world by experiencing it. Through our partnerships with National Geographic and TED, they develop the language and skills they need to be successful global citizens and leaders.

### Our World Readers

The *Our World Readers* are six levels of original stories, folk tales, myths, and non-fiction from around the globe. *Our World Readers* are a great way to encourage reading for fun and bring storytelling into the English language-learning classroom.

- **Facts and activities spreads** close each reader and tie the story to the real-world.
- **Big Books** are available for each Level 1 and 2 reader.
- Story Time video is available on the **Story Time DVDs**.

### National Geographic Ladders

Ladders differentiated readers are a family of three distinct programs focusing on developing reading comprehension skills in support of the Common Core State Standards. Each *Ladders Common Core* title reaches every student through multiple reading levels, while focusing on the exact same quality content, vocabulary, and visuals from National Geographic. This pedagogy continues with *National Geographic Ladders Science* and *National Geographic Ladders Social Studies*, each with a focus on reading informational text through high-interest, engaging science and social studies content.

### Global Issues

The *Global Issues* series consists of books at three reading levels covering 12 of the most important geographic and environmental issues of our time.

- Informational text for social studies and language arts classes
- High-interest topics and dramatic photography
- eBooks, sound effects, interactive vocabulary, and infographics
- Three reading levels (on level, below level, and above level) to reach every student
- Each topic and level is also available as eBooks and in Spanish (print and eBooks).
